

Contraceptive Implant Fitting at Kingston Health Centre

We want to make your implant fitting as straightforward and streamlined as possible. When you attend the clinic it is important that you have read all the information and are suitable for the procedure on the day.

Please make a telephone appointment with Dr Beattie , Dr McHugh or Dr Carr ahead of booking an implant fitting appointment if you wish to discuss it in more detail or have any concerns.

Implant Leaflet: <https://www.nhs.uk/conditions/contraception/contraceptive-implant/>

Please bring this form with you when you attend for Implant fitting

Name:

Date of Birth:

Please tick the boxed to confirm that you have understood and agreed the following.

- I have watched the video link above and / or read the leaflet
- I am using an effective method of contraception currently (NOT condom) and haven't had any problems (missed pills in 3 weeks, coil or implant overdue for change) OR I have avoided sexual intercourse completely since the first day of my last period. I understand that it is not appropriate to insert an implant if I might be pregnant.
- I understand that no method of contraception is 100% effective and that the implant has a very small risk of failure (less than 1 in 100 chance of pregnancy)
- I understand there is a very small risk of infection at the insertion site after the procedure
- I understand there will be a change in my periods with possible absent, irregular or more frequent bleeding.
- I understand that the implant will not protect against sexually transmitted infection. Condoms are advised in addition especially if you have a new partner.
- I know that I can contact Kingston Health Centre if I have any concerns about the implant
